CAREER OBJECTIVE

A recent Information Technology graduate seeking an opportunity as a Junior Software Developer where I can apply my foundation in frontend development, backend programming, and database management. Experienced in building academic software projects using modern development tools and frameworks, with a strong interest in creating efficient, scalable, and user-focused solutions. Highly motivated to expand my technical skills and contribute positively to a collaborative development environment.

SKILLS

Programming Languages Python, JavaScript, PHP, C, Java, HTML, CSS, SQL

Frontend Development: React, Tailwind CSS, Bootstrap, Responsive Web Design, UI Component Development

Backend Development: Django, Django REST Framework, Flask, REST API Development, Server-Side Programming

Database Management: PostgreSQL, MySQL, SQLite, Database Design, SQL Queries, Data Modeling

Tools & Technologies: Git, GitHub, Linux, VS Code, Version Control

Other Skills: Microsoft Office (Word, Excel, PowerPoint), Canva, Basic video editing

Soft Skills: Problem solving, Analytical thinking, Attention to detail, Adaptability, Time management, Continuous learning

EDUCATION & AWARDS

Eastern Visayas State University, Tacloban City

Aug 2022 - June 2026

- Magna Cum Laude
- Commendation for Academic Excellence
- Dean's Lister (2023-2026)
- Eastern Visayas Coding Olympics 2024 (C Category, 3rd Place - DICT Region VIII)

EXPERIENCE

Student Intern, Department of Science and Technology - Regional Office No. VIII

Feb 2026 - May 2026

- Developed web-based applications for automated document and form generation.
- Assisted in designing and maintaining responsive internal management systems.
- Completed technical training on enterprise intrusion detection systems.

PROJECTS

Student Internship Tracker (Django, Tailwind CSS, JavaScript, SQLite)

- Developed an internship tracking system with automated time and hour tracking.
- Implemented progress dashboards and monthly time record generation.
- Designed responsive interfaces for efficient internship monitoring workflows

School Student-Family Portal (Python, Django, HTML, CSS, Bootstrap, SQLite)

- Developed a web-based school portal connecting students, parents, faculty, and administrators on a centralized platform.
- Built role-based features for academic tracking, secure communication, enrollment management, and user administration.
- Designed a responsive user interface with Bootstrap and deployed the application on PythonAnywhere.

TRAININGS & CERTIFICATIONS

Designing and Implementing Open-Source Enterprise Intrusion Detection and Prevention System

April 2026

Department of Science and Technology - Regional Office No. VIII

- Configured Kali Linux and Ubuntu virtual machines for hands-on cybersecurity exercises.
- Applied SIEM, threat monitoring, and security orchestration concepts to analyze and respond to security events.
- Implemented web application hardening techniques and validated security measures through attack simulations.
